

NEW IP CONCEALMENTS

NSM Surveillance is proud to announce that all of the proven analog concealments we have supplied to law enforcement and the military for the past fifteen plus years are now available in IP Wireless, cell, cable or DSL transmission options. We also have a range of new IP wireless repeaters, fixed access points, and mobile IP receive kits. All of our overt and covert video surveillance products are Milestone compliant.

Please call or email and we will send you a Login for the secure "Covert Surveillance Equipment" section of our web site. If you already have a username and password, click [here](#) or on the login links at the top and bottom of this page.

I look forward to hearing from you and discussing how we can help you meet your mission needs.

Best regards,

Tony Di Fede
